

People we will learn about:

Neil Armstrong

Tim Peake

Mae Jemison

Crucial Knowledge

I will learn that...

- We live on planet Earth, and can see the Moon, the Sun and stars from Earth
- The sun has a group of planets around it that we call the Solar system
- There are planets in our solar system
- Astronauts have landed on the moon
- We use spaceships or rockets to go into space
- Astronauts are the people that go into space
- Astronauts eat and sleep on the spaceships

I will be able to...

- Talk about the first moon landing
- Describe some facts about living on a spaceship
- Name some common planets
- Explain some features of planets, for example the moon is made of rock; the sun is extremely hot

Key Space Vocabulary

Words I will learn

- Planet (and some common planet names)
- Star
- Astronaut
- Spaceship
- Meteor
- Moonrock

Meaning

A planet is a large object such as Jupiter or Earth in space

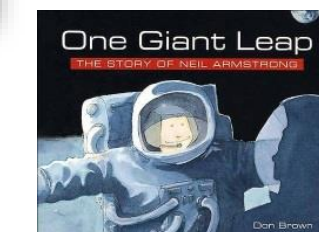

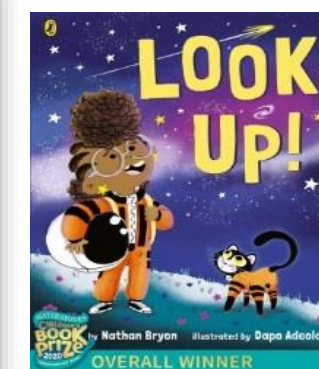

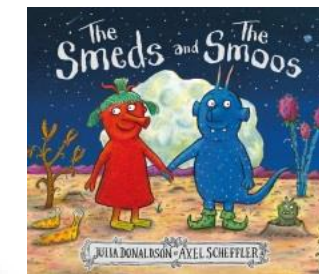

A brightly sparkling and shining object in space that is very far away from Earth

A person who is specially trained to travel into outer space.

Any vehicle or machine designed to fly in outer space

A lumpy chunk of rock or metal in outer space that can be brightly lit

The main material of the moon

This builds on our learning in Nursery about:

Transport, Past and Present, Understanding the World

This will help us when we learn about...

- Y1: The History of Flight
- Y5: Earth and Space in Science

Trips and experiences:

Space party, dressing up day, trying space food

Core Songs

- 5 Little Men in a flying saucer
- The Moon Song
- The Planetary Rap
